

# Bausch + Lomb Announces Scientific Data On Bausch + Lomb INFUSE™ Silicone Hydrogel Daily Disposable Contact Lenses To Be Presented At The Virtual Global Specialty Lens Symposium

January 20, 2021

## Bausch + Lomb Will Also Host Presentation on Technologies that Can Help Create Efficiencies in Fitting Zenlens™ Scleral Lenses on Patients

LAVAL, QC, Jan. 20, 2021 /PRNewswire/ -- Bausch + Lomb, a leading global eye health business of Bausch Health Companies Inc. (NYSE/TSX: BHC) ("Bausch Health"), today announced that two poster presentations will feature data on the new Bausch + Lomb INFUSE™ silicone hydrogel (SiHy) daily disposable contact lenses during the virtual Global Specialty Lens Symposium (GSLs) Annual Meeting, which takes place Jan. 21-23, 2021. Bausch + Lomb also will offer attendees the opportunity to participate in a presentation about its Zenlens™ scleral lenses.

"The continued response from patients has been overwhelmingly positive since we launched this breakthrough new lens last year in the United States, Canada and other countries around the world.\* In fact, in a survey among patients who tried Bausch + Lomb INFUSE lenses, 97% of patients agreed Bausch + Lomb INFUSE lenses provide crisp, clear vision throughout the day, and 94% of patients agreed Bausch + Lomb INFUSE helps keep contact lenses from feeling dry,"<sup>1</sup> said Joseph C. Papa, chairman and CEO, Bausch Health. "We are proud to continue to support ongoing research on this unique lens to help eye care professionals understand its clinical benefits and relevance for patients."

## Bausch + Lomb INFUSE Poster Presentations

The Bausch + Lomb INFUSE poster presentations will be accessible to conference attendees via the GSLs website from Jan. 21-23, 2021.

The poster presentations are as follows:

- Scheuer, Catherine et al. "Impact of a Novel Contact Lens on Maintaining the Native State of a Tear Film Protein"
  - An *in vitro* study to investigate the ability of a contact lens solution to stabilize the representative tear film protein lysozyme in its native state.
- Steffen, Robert et al. "Evaluation of the Stability of Surface Water Characteristics of Contact Lenses Using Refractive Index Shifts after Wear of Daily Disposable Lenses"
  - A study to investigate surface water stability using refractive index shifts after insertion for four unique polymers, kalifilcon A, delefilcon A, verofilcon A and nesofilcon A.

## Zenlens™ Event Presentation

On Jan. 22, 2021, from 5:15 to 5:45 p.m. ET, Bausch + Lomb will host a presentation featuring one of its prominent custom contact lenses, Zenlens™ scleral lenses, led by Jason Jedlicka O.D., FAAO, FSLs, FCLSA, associate professor and director of the Cornea and Contact Lens Service, Indiana University School of Optometry. During the event, "Using Technology for Fitting Success", Dr. Jedlicka will discuss how technology can help create fitting efficiencies using the Zenlens lenses through the use of corneal topography, scleral topography and anterior segment optical coherence tomography.

## About Bausch + Lomb INFUSE Contact Lenses

Bausch + Lomb INFUSE™ contact lenses are the only SiHy daily disposable with a next generation material infused with ProBalance Technology™ that work together to help maintain ocular surface homeostasis to help minimize symptoms of contact lens dryness and discomfort for exceptional clarity and comfort. The ProBalance Technology™ formula is infused into the lens material during the manufacturing process. These proprietary ingredients are released during lens wear. Bausch + Lomb INFUSE combines exceptional breathability for healthy lens wear with high moisture content and a low modulus. It also maintains 96% of its moisture for a full 16 hours. For more information on Bausch + Lomb INFUSE contact lenses, visit <http://www.bauschinfuse.com/>.
