

Bausch + Lomb Will Present 14 Scientific Posters Featuring New Analyses Involving Its Surgical Technologies At The 2021 Annual Meeting Of The American Society Of Cataract And Refractive Surgery

July 19, 2021

LAVAL, Quebec, July 19, 2021 /PRNewswire/ -- Bausch + Lomb, a leading global eye health business of Bausch Health Companies Inc. (NYSE/TSX: BHC) ("Bausch Health"), today announced the presentation of 14 scientific posters involving the company's ophthalmic surgical technologies at the American Society of Cataract and Refractive Surgery annual meeting, which will take place from July 23-27, 2021, in Las Vegas.

"Bausch + Lomb is committed to supporting continued research on our eye health products, because we recognize this is essential to fostering the kind of peer-to-peer discussion and learning that ultimately helps promote better patient outcomes," said Joe Gordon, U.S. president, Bausch + Lomb. "While this type of scientific exchange has continued in many forms over the past year, it's particularly exciting to see it return as part of live, in-person meetings."

Ten of the presentations discuss the clinical performance of one or more of Bausch + Lomb's enVista[®], Crystalens[®] and Trulign[®] intraocular lens (IOL) platforms. Two posters will highlight the results of studies in which investigators used the cloud-based eyeTELLIGENCE[™] clinical decision support software, which is available exclusively on the Stellaris Elite[®] vision enhancement system, to evaluate energy and fluidics metrics and analyze the impact of COVID-19 on ophthalmic surgeries. Another poster will compare the refractive astigmatism prediction accuracy of Emmetropic Verifying Optical toric calculator. A final poster will feature a clinical evaluation of the safety and efficacy of the ClearVisc[™] dispersive ophthalmic viscosurgical device, which was approved by the U.S. Food and Drug Administration for use in ophthalmic surgery in April 2021.

The full schedule of research (in alphabetical order) to be presented includes:

- *"Applying the Validated Spectacle Independence and Negative Symptom Surveys of Presbyopia Correcting IOL's to a Monofocal IOL."* Mahootchi, A.
- *"Clinical Evaluation of Safety and Effectiveness of New Dispersive Ophthalmic Viscosurgical Device (OVD)."* Jackson, M.
- *"Comparing Clinically Significant Lens Rotations in Various Toric IOL Platforms: A Retrospective Consecutive Case Series Analysis."* Hu, E.
- *"Evaluation of Energy-Fluid Metrics in Various Phases of Vacuum based Phacoemulsification with Cloud Based Database System."* Shultz, M.
- *"Evaluation of Rotational Stability on Enhanced Aberration Neutral Toric Monofocal IOL: A Prospective Multicenter Post-Approval Study."* Wiley, W. et al.
- *"Impact of COVID-19 on Ophthalmic Surgeries Utilizing a Cloud-Based Database."* Singh, IP.
- *"Improving Refractive and Visual Acuity Outcomes with Low Diopter Toric Intraocular Lenses Using Intraoperative Aberrometry."* Stephenson, D.
- *"Improving Surgical Efficiency with New Preloaded Monofocal Intraocular Lens."* Shultz, M.
- *"Long-term results of Presbyopic Correcting IOL With and Without CTR."* Liang, E.
- *"Long-term Safety Assessment of Plate-Haptic Toric Posterior Chamber IOL: A 3-Year Post-Approval Multicenter Study."* Stephenson, D.
- *"Low Cylinder Torics, Real World Practice, Prevalence."* Singh, IP.
- *"Performance of Barrett Versus Emmetropic Verifying Optical (EVO) Toric Calculators for Astigmatism Correction."* Pantanelli, S.
- *"Second Eye IOL Choice when Patient Is Unhappy with Trifocal Side Effects but Happy with Unaided Near Vision."* Mahootchi, A.
- *"Visual Outcomes and Effective Cylinder Correction on Enhanced Aberration Neutral Hydrophobic Acrylic Toric Monofocal IOL."* Whitman, J.
