

Bausch Health Licenses Novaliq's NOV03 Investigational Treatment For Dry Eye Disease Associated With Meibomian Gland Dysfunction

December 20, 2019

LAVAL, Quebec and HEIDELBERG, Germany, Dec. 20, 2019 /PRNewswire/ -- Bausch Health Companies Inc. (NYSE/TSX: BHC) ("Bausch Health") and Bausch + Lomb, its leading global eye health business, and Novaliq GmbH, a pharmaceutical company focusing on first- and best-in-class ocular therapeutics, announced today that Bausch Health has acquired an exclusive license for the commercialization and development in the United States and Canada of the investigational treatment NOV03 (perfluorohexyloctane), a first-in-class investigational drug with a novel mechanism of action to treat Dry Eye Disease (DED) associated with Meibomian gland dysfunction (MGD).

NOV03 is a proprietary water-free, preservative-free solution based on Novaliq's patented EyeSol® technology. DED is a chronic and serious disease of the ocular surface that can negatively impact quality of life¹. In a Phase 2 study, NOV03 met its primary sign endpoint of improvement of total corneal fluorescein staining over control at eight weeks with high statistical significance ($p < 0.001$). In addition, NOV03 showed statistically significant and clinically meaningful improvement in a variety of symptoms over the entire duration of the trial. A Phase 3 study is underway for NOV03, and Bausch Health anticipates starting an additional Phase 3 study in 2020.

"Bausch Health remains focused on boosting our core businesses, and the addition of this investigational treatment for Dry Eye Disease will help build upon our strong Bausch + Lomb portfolio of integrated eye health products," said Joseph C. Papa, chairman and CEO of Bausch Health. "It is estimated that more than 16 million patients in the United States are diagnosed with Dry Eye Disease², and if approved, NOV03 will be the first pharmaceutical therapy available for patients in the United States suffering from Dry Eye Disease with Meibomian gland dysfunction."

"We are thrilled to partner with Bausch + Lomb who is a leader in the ophthalmic space with a strong commercial footprint in the United States and is also very committed to developing innovative new eye health products," said Christian Roesky, Ph.D., CEO of Novaliq. "As part of Bausch + Lomb's portfolio, we believe that NOV03 will help address the unmet medical need of millions of patients suffering from Dry Eye Disease."

Under the terms of the licensing agreement, Novaliq is eligible to receive upfront and milestone payments based on regulatory and commercialization milestones, and sales royalties based on annual net sales of NOV03 in the United States and Canada.

Bausch Health has the right to pursue development and commercialization of NOV03 for DED and combination products based on NOV03 in additional ophthalmic indications in the United States and Canada. Novaliq will be eligible to receive additional undisclosed milestone payments plus royalties for any resulting combination products.

About Novaliq
